## Artensoft Tilt Shift Generator With License Key

Tilt Shift Generator is a powerful software application specifically designed for photography enthusiasts that want to create spectacular dioramas without using expensive tilt-shift lenses. Reproduce camera focus effects to create miniature scenes of favorite photos. The application features an intuitive and straightforward interface that is easy-to-use by both advanced and novice users. From the right-side corner of the main window, you can change the position of the focus area, as well as its size, increasing or decreasing the distance between the background and foreground lines as you see fit. Additionally, you can modify the focus area's angle without having to restrict yourself to a certain angle, as you do when using a digital camera. Enhance the quality of your photographs. You can create prominent out-of-focus regions in a way that is pleasing to the eye using the built-in bokeh mask feature which creates blurry regions around a central point of focus within your photograph. What's more, you can create multiple versions of the same picture simply by changing the aperture size and synchronizing the back and front focus. Additional options allow you to select various bokeh types, as well as adjust their intensity and hi-light levels. Besides these options, in order to create a harmonious and appealing photograph, you can tweak its brightness, contrast and saturation levels. Once you have finished editing pictures, you can save them by preserving their original size or you can change their resolution. Convenient software application for image processing. All in all, Artensoft Tilt Shift Generator helps you create artistic miniatures that you wouldn't be able to easily reproduce using a digital camera equipped with a tilt-shift lens and with no previous photography experience.
