There are many things to consider when you start thinking about commercial air conditioning, including your budget, the clientele you want to serve, your location and the number of employees that will require cooling or heating. This guide will cover some of the most important questions you will need to ask yourself when determining what form of air conditioning you want to use, as well as which other factors you will want to consider. Cost of the Unit It is important to look at the cost of the air conditioning unit before deciding on what type to use. Commercial air-conditioning equipment is one of the most expensive pieces of business equipment you can buy. In some cases, it can cost as much as ten times more than standard residential air conditioners. This may not be something you need to concern yourself with just yet, as it will depend on whether you will have enough clients that need the service. Price of the installation The installation costs of the air conditioning unit will be even more important when you start thinking about the other aspects of commercial air conditioning. Installation can be a bit harder, as it will depend on whether you will need to increase the size of your business space or simply add air conditioning to existing space
