Photoshop is available in a variety of editions ranging from the entry-level CS2 to the advanced CS5. ## Picture It Saving images in a digital format is much more convenient than capturing them on film, but it also means that they can be easily manipulated. Many digital cameras (those for your computer, mobile phone, and even some digital cameras) have built-in editing tools that enable you to color correct, crop, and enhance images as you take them. The built-in software is usually called a _RAW file_ editor. You can save your images using this software in order to get the best quality. If you don't own a camera with built-in RAW file editing, you can download programs from the Internet that enable you to do similar things. These tools and programs are called _image-editing tools._ ## Image Editing Tools Here are some of the better-known image-editing tools.

More Details: This tutorial explains step by step how to edit a photo using Photoshop Elements. As each photo you learn how to edit will be slightly different there will be steps for every photo. This video also includes some video tutorials by some of the people who created the other "How To" videos on the site. It is important to understand that every photo will be slightly different and will need different steps. That is the beauty of this tutorial. Video Summarized Video: THE FIRST PHOTO Step 1 – Add the Background Image The first step is to create the background image for the photo. This is really simple. Click on New to create a new image that will be set as your background. The size of the image is important so choose a size that works for your photo. You can change the background image later. Once created create a new image. Now change the layer in the Layers panel to active (make it the active layer). Now add a picture to your image. I suggest you use the stock available in this tutorial so that you can make your photo look nice without actually having to spend any money. Step 2 – Create a New Layer Once the background image is created a new layer can be created by hitting ALT+CTRL+N. The Layer > New Layer menu option is really easy to use. You just press the three keys together and the new layer will appear. The layer now becomes a new active layer and you can fill it with any solid color. Step 3 – Fill the Layer Most of the time you will want to fill the layer with a solid color such as white or black. Since this tutorial is about editing a photo let's add black to the photo. You can now click with the mouse on any part of the image and choose the color tool. Choose the Brush Tool and click on the black color at the bottom of the color palette. The color you have chosen should now be added to the layer. Step 4 – Replace the Background Color This is a bit complicated so let me explain. Using the Brush Tool you can remove the black from the layer. To do this just choose the Brush Tool and click and drag the brush on the layer. Step 5 – Re-Arrange the Image The image is not centered correctly

The U.N. agency for Palestinian refugees has expressed concern over Israel's maintenance of a military blockade over the Gaza Strip, calling on Israel to end the restrictions and allow the entry of food and medical supplies into the coastal enclave. The agency's assistant director-general, Carl Skottsberg, spoke during a meeting with the head of the International Committee of the Red Cross (ICRC) in Gaza City on Tuesday. "We are particularly concerned with restrictions on the movement of goods, people and medical supplies, among other matters, which are presently preventing humanitarian goods from reaching the civilian population," he said. "We appeal to the parties to immediately lift the restrictions and allow in more humanitarian goods," Skottsberg said. The ICRC is urging Israel to lift a blockade it imposed on Gaza following a terror attack that killed Israeli on board an Israeli bus. It has been involved in weekly consignments of food and medical supplies for the past nine months. ICRC head of the Gaza operations, Peter Maurer, appealed to Israel for the release of a number of Palestinian prisoners and their families. "We call on Israel to release the persons it has detained in connection with the current situation on the Gaza border," he said. "The majority of these people were detained before the current round of violence started. "There were also dozens of children who were detained in the course of the last operation." Israel has held almost 500 Palestinians, including more than 300 children, since the weekly border protests began. It has killed more than 120 of them. An ICRC report said in May that the number of people injured in recent weeks rose to more than 1,400, including more than 300 who required hospitalization. 10 brand names made disappear, how to find them November 20, 2017 With releases like Star Wars: The Last Jedi releasing this weekend, it's easy to forget that a few years ago, some top-tier comic book and film characters were going to be nixed from the cultural landscape. Case in point: Marvel's Agents of SHIELD, a show whose characters have made cameo appearances in the Marvel Cinematic Universe. Of the 10 major MCU characters, not only is the name SHIELD missing, but we've also been scrubbed of their respective brands, including Captain America, Iron
